

**Purpose of the test:**

Qualitative determination of the presence of *Chlamydia trachomatis*, *Ureaplasma spp.*, *Mycoplasma hominis*, *Mycoplasma genitalium*, *Trichomonas vaginalis* using real-time PCR  
**in A URINE SAMPLE.**

**The proper URINE sample collection for PCR testing:**

**We test MORNING URINE or URINE that has been in the bladder for at least 3 hours.**

- wash hands with soap and water, dry with disposable towel,
- pass the first part of urine into a sterile container (2- 3 ml phot. below)
- close the container without touching the inside of the cap or container,
- deliver the collected specimen to the laboratory within 2 hours.
